ENVIRONMENTAL PRODUCT DECLARATION

ATLAS ETICS
EXTERNAL THERMAL INSULATION COMPOSITE SYSTEMS
WITH ACRYLIC RENDERS
in accordance with ISO 14025:2010 and EN 15804:2012

1. BASIC INFORMATION

This declaration is the type III Environmental Product Declaration (EPD) based on EN 15804 and verified according to ISO 14025. It contains information about the impact of declared construction materials on environment and their aspects verified by the independent Advisory Board according to ISO 14025. Basically, a comparison or evaluation of EPD data is possible only if all the compared data were created according to EN 15804 (see point 5.3 of the norm) and the building context.

Issuance date: 10.03.2014
Validation date: 01.03.2014
Validity date: 10.03.2019
Declared durability: 50 years

2. LIFE CYCLE ASSESSMENT (LCA)

Declared unit
The declaration refers to 1 m^2.

System limits
The life cycle analysis of the examined products covers A1-A3 modules (Cradle to Gate) in accordance with EN 15804:2012. Its include production, including raw materials extraction and energy provision up to the finished, packed product at the factory gate. Processes whose total contribution to the final result, according to mass looked at, is less than 0.5 % was ignored.

Data collection period
The data for manufacture of the examined products refer to the year 2012. The life cycle assessments were prepared for Poland as reference area.

Data quality
The values determined to calculate the LCA originate from verified Atlas inventory data.

Assumptions and estimates
The impacts of the representative ATLAS products for each ETICS layer were aggregated using weighted average. The weighted average method was used according to the percentage of each product in ETISC based on the relation to whole production quantity.
Impacts for each product and factory were inventoried and calculated separately.

Note
Factory-prefabricated boards made of expanded polystyrene (EPS), mesh glass fibre and anchors are not produced by ATLAS. The impacts of those products were included from databases shown below.

Databases
The data for the processes come from the following databases: Ecoinvent, EMPA, Ullmann's, Plastic-Europe, ITB-Data, SPC.

3. PRODUCT INFORMATION

ATLAS ETICS is a trade name for External Thermal Insulation Composite System, which comprises insulation board (bonded and mechanically fixed) with reinforced undercoat, and decorative finishes as described in Technical Approval AT-15-9090/2014 (Domestic Approval). The system is complete and equipped with a vast selection of adhesives, base coats, renders and decorative coats of various colours. The system provides variety of solutions depending on requirements of the investors, building designers and construction workers. ATLAS ETICS also offers a wide range of solutions for all building types, from detached houses to multi-storey developments (< 25 m high). It is fully certified and the exact specification is tailored to meet the requirements of each project, whether residential or commercial, in compliance with all current building regulations in Poland.

4. PRODUCT DESCRIPTION

ATLAS ETICS is External Thermal Insulation Composite System in accordance with Polish national requirements described in ZUAT-15/V.03/2010. Kits to perform the thermal insulation of external walls using EPS boards as a thermal insulating material and a thinned facade finishes.
The insulation system is a kit of materials to be used in the proper order of layers and with the use of appropriate technology.

Components are shown below in Table 1:

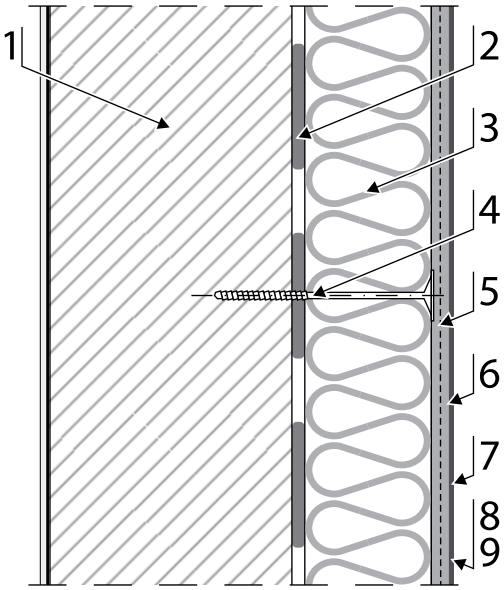
Table 1. ATLAS ETICS components

Intended scope		Trade name
Adhesives for bonding the insulation product		ATLAS HOTER S ATLAS STOPTER K-10
Insulation product *)		Factory-prefabricated, uncoated panels made of expanded polystyrene (EPS) according to EN 13163:2013
Reinforced layer	Adhesives for base coat	ATLAS HOTER U ATLAS STOPTER K-20 ATLAS STOPTER K-50
	Glass fibre meshes *)	AKE SSA-1363-SM 0.5
Key coats		ATLAS CERPLAST ATLAS SILKAT ASX ATLAS SILKON ANX
Finishing coats		ATLAS CERMIT mineral ATLAS CERMIT acryl ATLAS DEKO M/DEKO DIM ATLAS SILKAT ATLAS SILKON TYNK AKRYLOWY ATLAS TYNK SILIKONOWY ATLAS TYNK SILIKONOWO-SILIKATOWY ATLAS TYNK AKRYLOWO-SILIKONOWY ATLAS
Primers		ATLAS ARKOL SX ATLAS ARKOL NX
Decorative coats		ATLAS ARKOL E ATLAS ARKOL S ATLAS ARKOL N ATLAS FASTEL NOVA
Ancillary materials *)		Anchors, special fittings (e.g. base profiles, corner profiles ...)

*) products from suppliers, ATLAS does not produce these items.

Layers' arrangement in the ATLAS ETICS system is shown on Figure 1

Figure 1. ATLAS ETICS scheme



1. Wall structure (substrate)
2. Adhesive (basic fixing)
3. Thermal insulation (EPS)
4. Anchor (if necessary, additional fixing)
5. Reinforced layer (base coat with glass fibre mesh embedded)
6. Key coating (if necessary)
7. Finishing coat (renders)
8. Primers (optional)
9. Decorative coats (optional)

The main objectives of the ATLAS ETICS system are given below:
- providing external walls with appropriate thermal insulation (U value),
- reducing the costs for heating (also for cooling)
- reducing CO^2 and environmental protection
- improving thermal comfort for residents
- increase in durability of external walls by ensuring better protection from weather conditions
- "new look" for buildings walls.

The layers have precisely defined their technical and performance functions:
- adhesives are used for bonding the insulation product to the wall substrate and ensure stability of insulation
- the suitable thickness of EPS plates assures required thermal isolation,
- base coat applied directly onto the insulation product; the reinforcement is embedded into it and provides most of the mechanical properties of the rendering, glass fibre mesh in the base coat to improve its mechanical strength
- key coat - very thin coat which may be applied to the base coat and is intended to act as a preparation for the application of the finishing coat.
- finishing coat - coat which contributes to the protection against weathering and can provide a decorative finish;
- decorative coat - optional coat which generally provides the aesthetic finishing

The Technical Approval AT-15-9090/2014 covers a very wide range of products to perform every single layer of insulation system, for example 5 kinds of adhesives for bonding EPS boards, 3 kinds of adhesive to make the base coat, 3 kinds of key coats, 9 kinds of finishing coats (renders) and 5 kinds of façade paints. Also the thickness of the polystyrene foam boards, used during the work, can vary in every single case. Accordingly, environmental characteristics (LCA) for ATLAS ETICS are presented in a few cases, depending on:
- kind of finishing coat (mineral, acrylic, silicate, silicone or mixed (silicone-silicate and acrylic-silicone), and
- thickness of EPS boards for reference cases 10 cm, 12 cm, 15 cm or 20 cm.

Set out below is an analysis of the ETICS arrangement with acrylic renders.

Table 2. Overview of possible solutions – adhesives and reinforcement materials in combination with the relevant system finishing and decorative coats

Insulation fixing - basic	ATLAS HOTER S or ATLAS STOPTER K-10 or ATLAS HOTER U or ATLAS STOPTER K-20 or ATLAS STOPTER K-50
Insulation product	EPS boards, density 20 kg/m^3
Insulation fixing – additional	4 pieces per 1 m^2
Base coat	ATLAS HOTER U or ATLAS STOPTER K-20 or ATLAS STOPTER K-50
Glass fibre meshes	AKE or SSA-1363-SM 0.5
Key coat	ATLAS CERPLAST
Finishing coats	ATLAS CERMIT acryl or TYNK AKRYLOWY ATLAS or TYNK AKRYLOWO-SILIKONOWY ATLAS
Primers *)	ATLAS ARKOL NX
Decorative coats*)	ATLAS ARKOL E or ATLAS ARKOL N or ATLAS FASTEL NOVA

*) Decorative coats and primers are optional only

Table 3. An overview of average consumption particular products

ATLAS HOTER S or ATLAS STOPTER K-10 or ATLAS HOTER U or ATLAS STOPTER K-20 or ATLAS STOPTER K-50	4.0 – 5.0 kg/m^2
EPS boards, density 20 kg/m^3	1 m^2/1 m^2
Anchors	4 pieces /1 m^2
ATLAS HOTER U or ATLAS STOPTER K-20 or ATLAS STOPTER K-50	3.0 – 3.5 kg/m^2
AKE or SSA-1363-SM 0.5	1.1 m^2/1 m^2
ATLAS CERPLAST	0.3 kg/m^2
ATLAS CERMIT acryl or TYNK AKRYLOWY ATLAS or TYNK AKRYLOWO-SILIKONOWY ATLAS	2.5 – 4.5 kg/m^2 (regulated by particle size)
ATLAS ARKOL NX	0.05 – 0.20 kg/m^2
ATLAS ARKOL E or ATLAS ARKOL N or ATLAS FASTEL NOVA	0.125 – 0.250 dm^3/m^2

Table 4. List of ATLAS ETICS varieties in the cases of different thickness EPS boards

Short description	EPS thickness	Environmental characteristic for 1 m²
ETICS with acrylic renders	10 cm	See Table 10
	12 cm	See Table 11
	15 cm	See Table 12
	20 cm	See Table 13

5. PRODUCT MANUFACTURE

Raw materials and energy

The figures below show the working process during the production of dry mixes (Figure 2), ready-to-use renders (Figure 3) and paints (Figure 4). The raw materials are stored in the production factory in silos, big bags, or sacks accordingly. According to the applicable formulation, they are dosed and intensely mixed. Next, products are filled into containers (or packed into paper bags – dry mixes) and send to quality control. Then, they are temporarily stored, or delivered directly as ready-to-use products.

Figure 2. Production process – dry mixes (scheme)

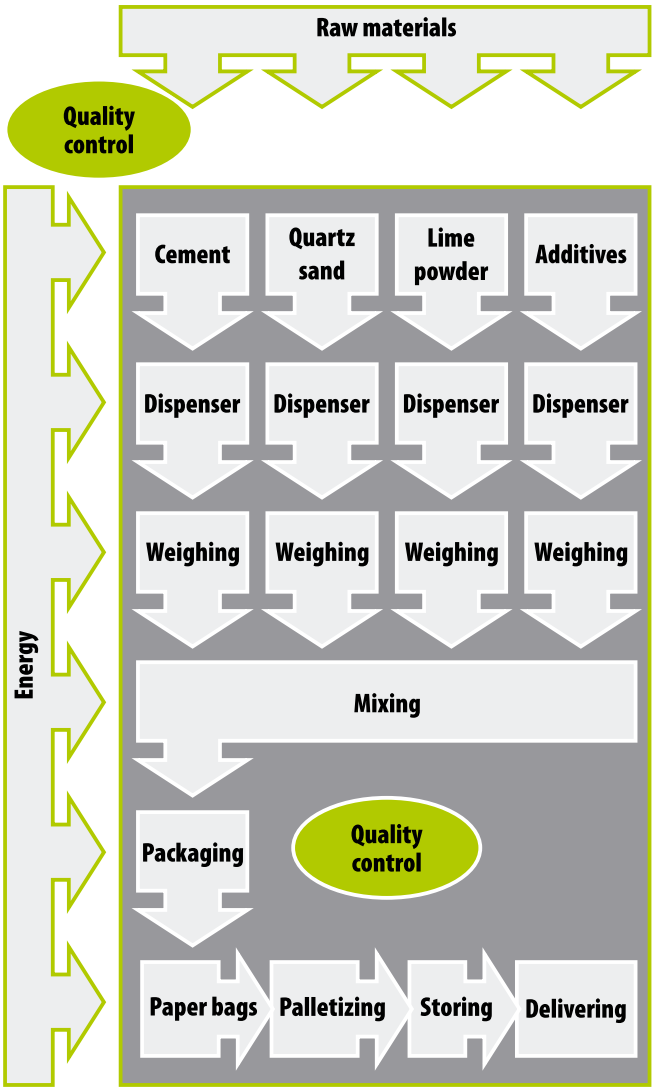

Figure 3. Production process – ready-to-use renders (scheme)

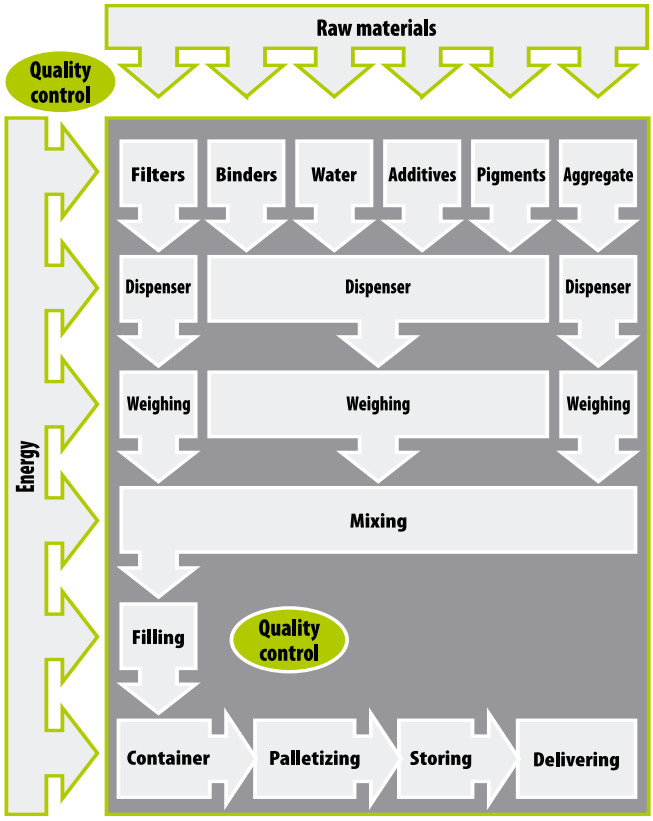

Figure 4. Production process – paints and primers (scheme)

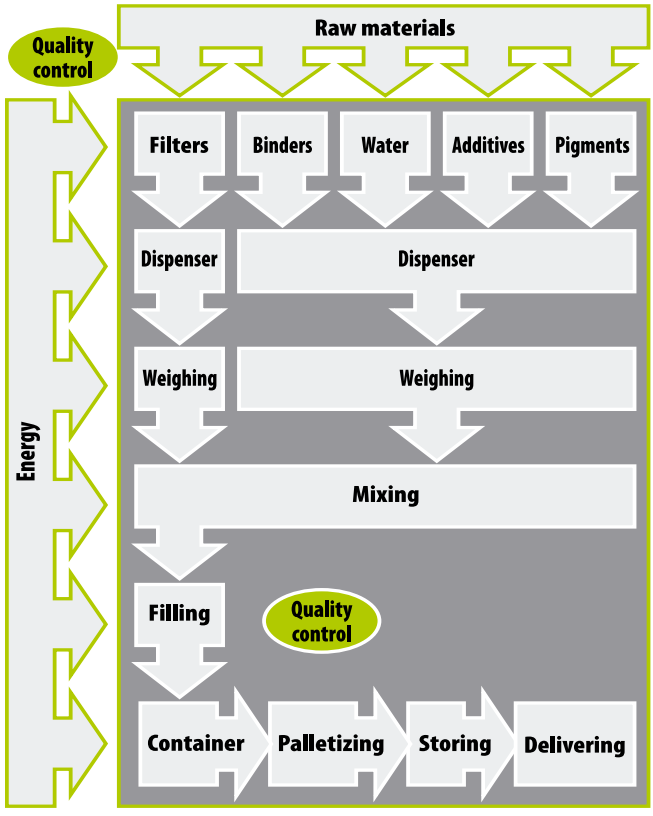

6. PRODUCT APPLICATION

The thermal insulation technology, used in fixing thermal insulation, is made of foamed polystyrene boards (EPS) to the substrate and preparation of a reinforced layer, a render coating and, a paint coating (optionally). The system can be applied both on new, or existing external surfaces of vertical building walls (already plastered, or not) made of masonry, or adhered materials, such as bricks and blocks (ceramic, lime-sand, stone, cellular concrete), or of concrete (poured at the construction site, or in the form of prefabricated elements). To perform each of the layers, according to the need, one of different construction products listed in Table 1 and then in Table 2 can be used.

Occupational safety and environmental protection

Occupational safety and environmental protection are described in Material Safety Data Sheets (MSDS) for each product.

Note

Specific information on application and other actions with these products are described in detail in the Technical Data Sheet available on the producer website **www.atlas.com.pl**.

7. EMISSIONS (LCI) AND THEIR IMPACT ON THE ENVIRONMENT

The following chapter show the life cycle inventory analysis of the adhesives with regard to primary energy needs, water needs, emissions into air and waste.

Table 6. Primary energy consumption for A3 module on m^2 of ETICS

Energy resource	Unit	used on product [unit/Mg]	used on product [unit/m^2]
electricity	kWh	62.54	0.700
black coal	Mg	—	—

VERIFICATION

The process of verification of an EPD is in accordance with EN ISO 14025, clause 8 and ISO 21930, clause 9. After verification, this EPD is valid for a 5-year-period. EPD does not have to be recalculated after 5 years, if the underlying data have not changed significantly.

The basis for LCA analysis was EN 15804

Independent verification corresponding to ISO 14025 & 8.3.1.

☑ external ☐ internal

Verification of EPD: dr eng. Aleksander Panek
LCI audit and input data verification: msc eng. Dominik Bekierski
LCA: dr eng. Michał Piasecki
Verification of procedures and declaration: dr eng. Halina Prejzner

Instytut Techniki Budowlanej

Zakład Fizyki Cieplnej, Instalacji Sanitarnych i Środowiska

02-656 Warszawa, ul. Ksawerów 21

ŚWIADECTWO nr 020/2014
DEKLARACJI ŚRODOWISKOWEJ III TYPU

Wyroby:

Zestaw wyrobów do wykonywania ociepleń ścian zewnętrznych budynków systemem ATLAS ETICS z tynkiem akrylowym

Wnioskodawca:

ATLAS Sp. z o.o.

91-222 Łódź, ul. Św. Teresy 105

potwierdza się poprawność ustalenia danych uwzględnionych przy opracowaniu Deklaracji Środowiskowej III typu oraz zgodność z wymaganiami normy

PN-EN 15804:2012

Zrównoważoność obiektów budowlanych.
Deklaracje środowiskowe wyrobów.
Podstawowe zasady kategoryzacji wyrobów budowlanych.

Niniejsze świadectwo, wydane po raz pierwszy 10 marca 2014 r. jest ważne 5 lat, lub do czasu zmiany wymienionej Deklaracji Środowiskowej
